# HTML ATTRIBUTES

## Attributes

- Provide additional information about elements
- Always in name/value pairs like name="value"
- Common attributes: **id, class, style, src, href, alt**

- Provide additional information about elements
- Always in name/value pairs like `name="value"`
- Common attributes: **id, class, style, src, href, alt**

The diagram shows an HTML tag: ``. Above the tag, the word "Attribute" has a downward-pointing arrow directed at the `src` and `alt` attributes. Below the tag, the word "Element" is centered, with two horizontal arrows pointing towards it from the left and right sides of the tag, indicating the entire tag structure as the element.
